*The Pergo InterLock locking system, produced under license from The Pergo Group.

†AC ratings rank the level of durability of a laminate floor. AC ratings give consumers a tool to measure a laminate floor's resistance to abrasion, impact, stains and cigarette burns. There are five AC ratings between 1 and 5, with 1 denoting less resistance to wear and 5 denoting highest resistance to wear. Since Toklo is rated AC3 and above, it's suitable for both residential and commercial uses.

3 GOOD REASONS TO BUY TOKLO.

Toklo is the best laminate floor on the market today. Here's why.

1. Standards. And exceeding those standards.

We build Toklo to stringent European standards. Which one exactly? Toklo complies with EN 13329, set in 2006, a standard which establishes the characteristics, requirements and classifications a laminate floor must meet and gives methods for manufacturers like BuildDirect to test against. Knowing these standards we built Toklo to exceed standards in the area of moisture resistance—one of the most vulnerable areas for any flooring.

2. A tropical hardwood core—a step above the competition.

Unlike other manufacturers, we make our high-density coreboard from hardwood, not softwood, giving it greater stability and durability. That's why we say Toklo is tough. Having hardwood as its core means your floor will look good and stay that way for longer. Plus the hardwoods we use are tropical and naturally more moisture-resistant than the competition. Toklo is made from plantation trees that are replanted regularly. Every part of the tree is used in the production of our Toklo coreboard including off-cuts, peeler core and wood slabs. Previously these pieces were disposed of, but with Toklo we're making the most of our precious resources. That way nothing is left to waste—a nice environmentally-friendly benefit for the best floor on the market.

3. The Pergo Locking System with a waterproof finish.

Toklo is made using Pergo's world-renowned InterLock locking system, produced under license from The Pergo Group—for the easiest and fastest install ever. To make the entire system even more durable, we've added a rock-hard wax sealant to waterproof Toklo on all 4 sides. With the Pergo locking system sealed to prevent moisture penetration, the most vulnerable part the flooring system is protected. It also prevents that squeaky noise you can find with other laminate floors that do not have waxed edges. A nice little bonus.

Plus it's made by BuildDirect.

When you buy a BuildDirect product you can be assured of the highest quality standards at the lowest price. With Toklo, we have control over the entire process from the supply of raw materials to manufacturing. That's why you get the same great quality with every piece of Toklo at prices that can't be beat.
